THE HERALD is authorized to announce

John N. Garner,

as a candidate for re-election to Congress from the Fifteenth Congressional District, subject to the action of the Democratic party.

THE HERALD is authorized to announce

John G. Willacy,

as a candidate for State Senator from the 32nd, Senatorial District, subject to the action of the Democratic primaries.

The Herald, Daily and Weekly, is the only paper published in Cameron county.

LOCAL AND PERSONAL.

J. P. Laird, a traveling man from Atlanta, Ga., was an incoming passenger Saturday afternoon. He left again this morning.

Mrs. J. F. Perrenot, of Uvalde, arrived in the city Saturday to visit her sons, Hal and Jack, who are employees of the Gulf Coast Line. She is the guest of Mr. and Mrs. Hal Perrenot.

E. B. Gore and J. M. Shepherd, of the engineering corps of the Brownsville Hidalgo & Northern railroad, spent Sunday in the city. On account of the swollen condition of the river the work of permanent location of the line has been somewhat retarded, but Chief Engineer Gore says they will finish the line from Brazos Santiago to Brownsville next Tuesday. When this has been completed a line will be located to Corpus Christi along the coast, which it is calculated to complete in about six weeks.

The river is reported to have fallen about three-fourths of an inch last night, and then to have risen a like amount. It would only take a few more inches to give the railroad company considerable trouble at the "X" here. There

is a good deal of water in the Arroyo Colorado, but no damage is anticipated from that source. The railroad company is watching the water very closely, and will take every necessary precaution to prevent it from spreading and causing damage.

Mr. and Mrs. Benj. Kowalski and children, accompanied by their guest, Mrs. Welch and children of Marshall, Texas, and Mr. and Mrs. D. Alexander of Victoria, Texas, left Saturday for the Point to spend some time at their summer home there.

A. & M. College.

President Harrington of the A. and M. College will ask the legislature for \$10,000 with which to assist in introducing the study of agriculture into the public schools.

Dr. Joe Gilbert, who has been elected resident physician at the A. & M. College, graduated from that school in 1894. He later studied medicine and for several years was the physician at the Confederate Home in Austin.

The bulletins of the Texas Experiment Station are mailed out free of charge to anyone sending his name to the director at College Station. The mailing list already contains 25,000 names. Get your name on the list and keep step with the procession.

State Entomologist A. F. Conrad reports that he has inspected 15,000 colonies of bees in his effort to prevent the spread of the disease known as foul brood. He has also inspected a large number of orchards and nurseries to prevent the spread of the dreaded San Jose scale, which has recently made its appearance in Texas.

State Feed Inspector B. C. Pit-tuck has issued during the year nearly eight million tax tags for pure stock feed. That means a movement of nearly four hundred thousand tons of concentrated feed stuffs. Three traveling inspectors are kept on the road continually and two chemists are required to analyze the samples of feeds sent in by the inspectors.

The annual meeting of the Farmers' Congress at the A. and M. College has not brought the full benefit of its power to that institution. Properly directed the demands of the Congress in the interest of the College would be granted by almost any legislature. There should be a closer union between the College and the Congress to the improvement of both.

All of the forty-six members of this year's graduation class at the A. and M. College had accepted positions in their chosen lines of work before they received their diplomas. Three of the forty-six were graduates of the new school of architectural engineering, and three of the new textile school. Two of the textile graduates have accepted positions in the cotton mills of North Carolina, while the third has a position in the Belton cotton mill.

The pure feed law passed by the last legislature has been of great benefit to the farmers and dairymen as well as all other people who buy stock feeds. In the administration of this law and of the fertilizer law the A. and M. College has shown conservatism, wisdom and economy. The well equipped laboratories at the College greatly facilitate the work of inspection and analysis. The people of the state were at first indifferent to protection from fraud in the sale of feed stuffs and fertilizers but they have been educated until they now demand it.

An exchange tells of the following: A very poor man applied for membership in a very exclusive church. They hardly liked to turn him down, so requested him to take the matter to the Lord in prayer and come again. In about two months he showed up. They questioned him as to what reply, if any, he had received, and he said: "The Lord told me not to get discouraged. He said He had been trying to get into that church for seven years, but had not succeeded."

BISON IN WICHITA RANGE

Offer Made by New York Zoological Society to the Government is Accepted.

New York—The offer made by the New York Zoological Society to the United States Government regarding the placing of a herd of buffaloes on the Wichita forest reserve in Southwestern Oklahoma has been accepted and the conditions named will be promptly met.

As an evidence of a desire to preserve the American bison the Zoological Society offered to the government as a gift a herd of between fifteen and twenty buffaloes, provided the government would fence in a suitable range on the Wichita reserve, wherein the herd could be maintained without the expense of constant feeding. An area of about twelve square miles of good grazing grounds, provided with permanent water and shelter from storms, was selected. An item was inserted in the agricultural bill for \$15,000 with which to erect the fence necessary for an inclosure for the maintenance of the buffalo herd.

Inasmuch as the agricultural appropriation bill is now a law, the fund is available and the Department of Agriculture proposes to take immediate steps to procure the erection of the fence. As soon as the fence has been completed the Zoological Society will deliver its gift herd.

The gift of the Zoological Society is prompted solely by patriotic motives and not because of the fact—as has been erroneously said—that the buffaloes in the Bronx Zoological Park are not doing well. As a matter of fact, no buffaloes in captivity are in finer condition or breeding more readily than those in Bronx Park, which is today the largest and finest herd on public exhibition anywhere.

It is conceded, however, that the American bison can not be preserved from ultimate extinction in the close confinement of zoological gardens. This animal can be saved only by establishing herds on very large areas, so that the animals will be in a semi-wild state and will thereby obtain the exercise that is absolutely necessary to their permanent welfare.

It is hoped that the fencing of the Wichita buffalo range can be accomplished in time for the herd to be transferred from New York some time in October or November.

Arabella's Dowry.

When Mrs. Simpson laid down the paper she had been reading she looked thoughtfully at her husband for some moments before she spoke. From across the cold little hall came the sound of Arabella's voice and that of the young man she was soon to marry. "We haven't got a sign of a dowry for Arabella, pa," said Mrs. Simpson at last.

"What's that?" asked Mr. Simpson, suddenly aroused from his perusal of the weekly paper.

"A dowry is things parents give a daughter when she is married, like heirlooms and money and fine linen," said Mrs. Simpson, impatiently. "You know this, but you've forgotten. Arabella hasn't one thing but the clothes she's made herself. Will wouldn't expect us to give her money, and as they're going to live with his folks she doesn't need the linen but I wish to mercy we'd got some heirlooms for her."

"Well, why haven't we?" demanded Arabella's father, stoutly. "What's the reason she can't have Grandfather Brickett's old powderhorn and flintlock and the old coonskin cap? She's all the child we've got, and I shan't ever use 'em again. There's his old knife, too. I've got me a new one which cuts full as well. I guess we can fit her out, and if she wants more let her have the old belluses."—Southern Messenger.

What a woman likes is to get in an argument with her husband so he can prove she is wrong, so she can cry, so he will have to give her a nice present to make it up to her.—New York Press.

The Columbus
